On June 1, 1973, this office conducted an investigation of a complaint against Hoffman-Taft Manufacturing Plant in Verona, Missouri, which we received from you on May 29, 1973.

At the time of that investigation, I was shown by you a tile pipe which appeared to be coming from the property of Hoffman-Taft Mfg. Plant. This pipe was discharging an orange precipitate to a ditch on your property.

I subsequently showed this same pipe to Mr. Bagby (Plant Manager of the Verona Plant) an another employee of that plant. Neither Mr. Bagby nor the other employee knew where the pipe originated, but both of them indicated that they were sure that the pipe did not come from the property of Hoffman-Taft Mfg. Plant. They indicated that the pipe might come from either the old water works or the city itself. Mr. Bagby informed me that there might be another pipe farther down the ditch on your property.

At the time of our meeting you had indicated a plan to destroy the pipe. I feel this might be a good plan. It would both protect your property and might indicate the origin of the pipe. However, please wait to proceed with plugging the pipe until we complete our investigation.

I hope this office has been of some help to you in clearing up this matter. Please keep this office informed.

If this office can be of any further help to you, please contact us.

Yours truly,

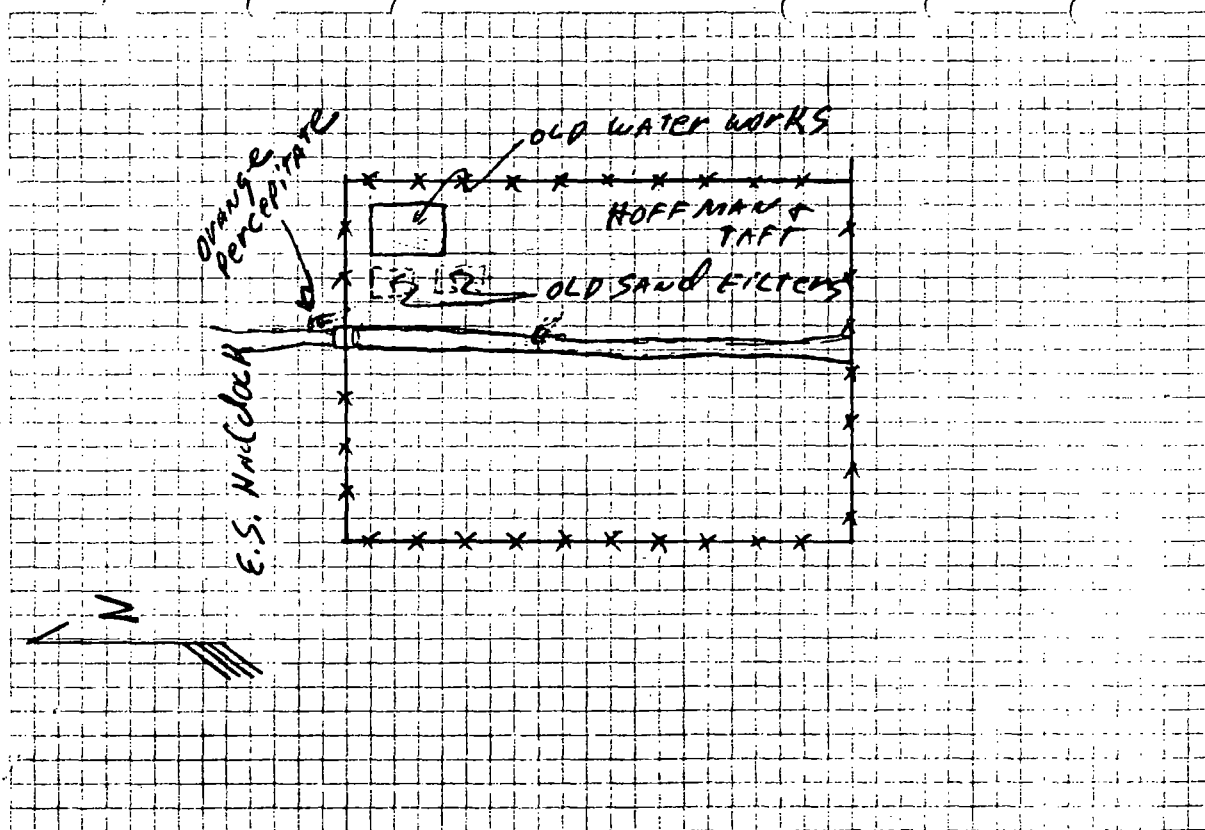

Stephen S. Kintner

MEMORANDUM

TO Jim B. ED FROM Steve JIM
SUBJECT Attached DATE 5-29 1973

Dist 5, DOH brought this in for us. I am
unaware of the pipe he is talking about
so this would be worth looking into.
